Arthur S. Przybyl, President and CEO, stated, "Our business operations demonstrated significant operating leverage during the quarter; we increased our revenues by 19%, or \$1 million, while decreasing our cost of sales by 1%. This result helped generate adjusted non-GAAP EBITDA of \$1.2 million. Also during the quarter, we completed our merger, strengthening our balance sheet, and potentially providing us with future royalties from a product partnered with Teva. We are now listed on NASDAQ under our new symbol, ANIP. We filed one new ANDA during the quarter and remain on track to file four additional ANDAs prior to year end as we continue to invest in our product development pipeline."

Second Quarter Results

For the three months ended June 30, 2013, ANI Pharmaceuticals, Inc. ("ANI") reported net revenues of \$6.2 million, an increase of 19% from \$5.2 million for the same period last year. The increase in revenues was primarily due to a 26% increase in net prescription sales, from \$3.1 million to \$3.9 million. In addition, contract sales and royalties increased 7%, from \$2.1 million to \$2.2 million.

Adjusted non-GAAP EBITDA was \$1.2 million for the three months ended June 30, 2013, compared to \$0.7 million for the same period in the prior year, an increase of 66%.

Cost of sales decreased 1% to \$2.1 million for the three months ended June 30, 2013, from \$2.1 million in the prior year, and decreased as a percentage of net sales to 34% from 41%. The decrease in cost of sales as a percentage of net sales is primarily due to a favorable shift in product mix toward higher margin products as well as a decrease in raw material costs.

Research and development costs increased by 108% to \$0.4 million in the three months ended June 30, 2013, from \$0.2 million in the prior year period. Included in the increase was a Generic Drug User Fee Act ("GDUFA") fee of \$52,000 in the second quarter 2013 and increased spending on development activities. ANI filed one Abbreviated New Drug Application ("ANDA") during the period.

Selling, general and administrative ("SG&A") expenses and salaries and benefits increased to \$7.2 million from \$2.0 million. The increase was primarily due to merger-related non-cash equity bonuses paid to ANI executives of \$4.4 million, consistent with the Company's belief in employee ownership and alignment with shareholders, and \$0.3 million in legal and other merger-related expenses.

The operating loss was \$3.8 million for the three months ended June 30, 2013, which included \$4.8 million of merger-related expenses.

The net loss was \$4.6 million for the three months ended June 30, 2013, which included \$5.5 million of merger-related expenses.

Results for Six Months ended June 30, 2013

For the six months ended June 30, 2013, ANI reported net revenues of \$11.7 million, an increase of 17% from \$10.0 million for the same period last year. The increase in revenues was primarily due to a 38% increase in net prescription sales, from \$5.4 million to \$7.5 million. This was partially offset by an 8% decrease in contract sales and royalties, from \$4.6 million to \$4.2 million.

Adjusted non-GAAP EBITDA was \$1.9 million for the six months ended June 30, 2013, compared to \$1.5 million for the same period in the prior year, an increase of 29%.

Cost of sales increased 12% to \$4.4 million for the six months ended June 30, 2013, from \$4.0 million in the prior year, and decreased as a percentage of net sales to 38% from 40%. The decrease in cost of sales as a percentage of net sales is primarily due to a favorable shift in product mix toward higher margin products as well as a decrease in raw material costs.

Research and development costs increased by 50% to \$0.7 million in the six months ended June 30, 2013, from \$0.5 million in the prior year. Included in the increase was a GDUFA fee of \$52,000 in the second quarter 2013 and increased spending on development activities. ANI filed one ANDA during the period.

SG&A expenses and salaries and benefits increased to \$9.5 million from \$3.9 million. The increase was primarily due to merger-related non-cash equity bonuses paid to ANI executives of \$4.4 million, consistent with the Company's belief in employee ownership and alignment with shareholders, and \$0.5 million in merger-related expenses.

The operating loss was \$3.4 million for the six months ended June 30, 2013, which included \$5.0 million of merger-related expenses.

The net loss was \$4.3 million for the six months ended June 30, 2013, which included \$5.7 million of merger-related expenses.

ANI Product Development Pipeline

Products	ANI	Partnered	Total
At FDA	5	0	5

The pipeline includes extended-release products, narcotics, anti-cancers, oral solutions, suspensions and solid dosage forms. These eleven generic products address a total annual market size of approximately \$760 million, based on data from IMS Health.

Adjusted non-GAAP EBITDA

ANI considers adjusted non-GAAP EBITDA to be an important financial indicator of ANI's operating performance, providing investors and analysts with a useful measure of continuing operation results unaffected by merger-related expenses and differences in capital structures, tax structures, capital investment cycles, ages of related assets and compensation structures among otherwise comparable companies.

Adjusted non-GAAP EBITDA is defined as net income/(loss) from continuing operations excluding depreciation, amortization, interest expense, taxes and other non-operating expenses, and merger-related expenses not already excluded. Adjusted non-GAAP EBITDA should be considered in addition to, but not in lieu of, net income or loss reported under GAAP. A reconciliation of adjusted non-GAAP EBITDA to the most directly comparable GAAP financial measure is provided in Table 2.
